OOAD Project Proposal

Title: The Book Studio (thebookstudio.org)

Proposal Description:

Project Proposal:
We intend to design a freelancing marketplace regarding audiobooks where writers, narrators, studio persons, sound engineers and publishers will be able to interact, hire and produce audiobooks. They will also be provided with an ebook store to promote their licensed work. Marketplace and the ebook store will also have an affiliate sign-up program to involve the general public in the promotion.

The motivation behind this project:
The prolonged unavailability of books due to covid-19, and eyesight threats caused by the continuous reading of pdf books has led to an uptake of audiobooks in the western world. There is a growing need for relevant platforms in the eastern world for their languages to evolve.
